

Made in New Zealand from Sugar, Manuka Honey, Kiwifruit and Aloe Vera, and with a luxurious fragrance, the **Phâro Salon Sugaring System** is simply the most natural and effective hair removal solution ever!

The application temperature for **Phâro** is 20°C **lower** than waxes, and unlike waxes that stick to the hair and the skin, the **Phâro** gel adheres only to the hair and **NOT** the skin. This results in significantly less discomfort and skin redness. **Phâro** is water soluble so cleanup is quick and easy, requiring only warm water to clean the skin, equipment and surfaces. This makes it ideal for therapist and client alike. **Phâro** is available in Warm and Firm Gel variants which are formulated for maximum effectiveness for specific body areas.

- NATURAL / GENTLE ON SKIN
- WATER SOLUBLE FOR QUICK AND EASY CLEANUP
- LOWER APPLICATION TEMPERATURE RESULTING IN LESS REDNESS
- STICKS TO THE HAIR, NOT THE SKIN FOR LESS DISCOMFORT.

products

700g pot Firm Gel For use on coarse hair, bikini line, brazilians, underarm hair and eyebrows.

700g pot Warm Gel For use on fine hair, legs, arms, face, back and stomach.

Roll-On Cartridges Warm Gel for fast easy application on legs, arms, back and stomach.

Antibacterial Cleansing Wipes Phâro Antibacterial Cleansing Wipes prepare the skin for the sugaring treatment. These wipes are excellent for cleansing the skin of moisturisers or perspiration to ensure maximum product effectiveness. They can also be used to clean surfaces and equipment. The wipes are not recommended for use on the face. For the face area, use **Phâro Pre-Treatment Cleanser and Toner**.

Pre-Treatment Cleanser and Toner. With Tea Tree oil and Witch Hazel this alcohol free cleanser is the natural, effective and gentle way to cleanse and tone the face or for clients who have skin conditions like eczema and psoriasis.

Apres-Sugaring Hydrating & Cleansing Mist Infused with Witch Hazel, Aloe Vera and Arnica, this cooling spray is used after Sugaring to soothe, cool and moisturise the skin. Arnica and Witch Hazel have proven effectiveness against any redness and spotting that may occur during the hair removal process.

Latex Gloves These strong, natural powder free gloves are snug fitting and ideal for Sugaring. The black gloves do not stain and present a clean professional image.

Hydroentangled Strips These are excellent strips and have been put through a sterilizing process offering added hygiene. They are specially formulated for extra strength and to prevent the gel seeping through the fabric.

NOTE: After hair removal we recommend our **Phâro Exfoliating Cloth** to prevent ingrown hair. This may be used 2 to 3 times a week in the shower.

instructions for using the **Phâro roll on system**

- Screw on a roller head to the cartridge and place it in heater with the roller face forward.
- To heat a cartridge quickly, turn the temperature control knob to 4 for 4/5 mins .
- Pull out the cartridge from the heater and turn it over to check that the gel has reached a flowable consistency. If it has, then with the cartridge still held upside down, gently squeeze the cartridge till the gel

just oozes through the roller head.

- Put the cartridge back into the heater unit and set temperature control knob to between 2 and 3.
- Lift the hand unit out of the base, turn it upside down and roll out a couple of times on a waxing strip to get the gel flowing through evenly.
- Between applications return the hand unit to the base to allow re-heating.
- Roll on the gel in the direction of hair growth (e.g. downwards on the legs).

using the **pot warmer**

- The **Phâro Pot Warmer** offers a professional, temperature controlled environment for consistent application and results. Remove the cap and inner seal from the gel pot and stand the pot in the chamber of the heater.
- To heat a pot quickly, turn the temperature control knob up all the way. The pot should take between 15 to 20 minutes to heat up.

As the gel approaches a spreadable state, stir the gel with a wooden spatula to achieve a uniform consistency. Turn the temperature control knob to between 3 and 4 to maintain the gel temperature.

microwave heating a pot

NOTE: Take care never to overheat the gel.

- Remove the cap and inner seal from the gel pot and stand the pot in the microwave.
- The 700g pots of sugaring may be microwaved (typically one minute for a full pot – scale down accordingly) until the gel has a consistency similar to pourable liquid honey. As the gel approaches a spreadable state, stir the gel with a wooden spatula to achieve a uniform consistency.
- Take the pot out and put it into the pot warmer (set between 3 and 4) to maintain the temperature.
- **TEST THE TEMPERATURE BEFORE APPLYING.**

treatment

1. Prepare skin for treatment by making sure the skin is clean, cool and dry. Any makeup, moisturiser or perspiration must be removed prior to sugaring. Use **Phâro Pre-Treatment Cleanser and Toner** for the face, and the **Phâro Antibacterial Cleansing Wipes** for other areas of the body.
2. Apply a thin layer of gel (using the roller or spatula) in the direction of the hair growth. The width of the patch of gel applied should be slightly less than the width of a hair removal strip and about $\frac{3}{4}$ of its length. The gel must slide easily on the skin. If it starts to pull the skin it is an indication that the gel is becoming too cold and will need warming.
3. Place a **Phâro Hair Removal Strip** over the gel and rub it down firmly in the direction of hair growth. Hold the skin taut and remove the strip with a long low flick (not upwards) in a single sharp movement against hair growth.
4. For shorter hairs or stubborn hair (e.g. underarms or bikini line) use the **Firm Gel**. REMEMBER when treating underarms with multidirectional growth, always apply in the direction of the hair growth and remove in the opposite direction.
5. When the treatment is finished clean the skin with a damp cloth and apply the **Phâro Après Sugaring Hydrating Mist**. This cools the skin, and the Witch Hazel and Arnica are excellent agents to soothe the area.
